ALS SIMULATOR ADVANCED

Top ten reasons why ALS Simulator Advanced is important for your simulation training

Laerdal introduces ALS Advanced, the perfect tool to effectively target EMS, Nursing Practitioners and Healthcare Providers training needs.

#10 - ALS Simulator Advanced will lower your training costs

- You can reduce the development time of your new staff and improve team performance.
- Reduce medical errors and reduce liability.
- Train more learners with fewer staff and in less time.

 # 9 - The manikin's flexibility will assist you in implementing or enhancing your training program

- Customers can go back and forth between the mobile VitalSim platform and the new laptop PC platform.
- Use ALS Simulator in its VitalSim platform for in transit, field and transport scenarios.
- Use the laptop PC platform for more complex in-hospital scenarios.

 # 8 - With ALS Advanced you will have a wider and more complex variety of pre-packaged scenarios

- You will have access to new, more complex set of compatible SimMan pre-packaged scenarios
- You can implement Laerdal's complete offering of courseware on the new ALS Simulator Advanced

 # 7 - This Patient Simulator will help overcome limited access to clinical time

- You can document learner performance without risk!
- Your staff will be prepared for rare emergencies and dangerous situations

 # 6 - New Advanced version enhances your educational environment.

- Enable video recording and review an event log together with synchronized recording of the patient monitor and in-room video for a smoother, more efficient simulation session.
- Incorporate audio files and Programmable scenarios with Trends and Handlers based on well proven SimMan Software.

 # 5 - ALS Simulator Advanced helps improve cognitive skills

- Improve Psychomotor and Cognitive skills
- Improve team communication and performance

 # 4 - The new debriefing software allows the instructor to allocate time where it is really needed: teaching.

- Accurate debriefing provides performance feedback and facilitates any remediation

 # 3 - Improve Competency by training in real environments without risk.

- You can train in real environments making it easier to engage your learners
- Improve team performance by training in real environments.

 # 2 - ALS Simulator Advanced is the perfect, cost-efficient tool to implement your Simulation based Training Program

- ALS Advanced, peripheral kit and accessories are priced specifically to get you started right away with your training program.
- Get the best value in the market for Patient Simulators, service and education. ALS Simulator Advanced is your easy entry point into the Simulation world.

 # 1 - ALS Simulator Advanced helps you save lives

- If it saves just one life, it’s well worth the cost of the Patient Simulator.

A Simulator purchase should always include an educational offering.
