Resusci Anne® CPR-D

Quality CPR and live defibrillation training with real-time feedback and evaluation report

The Resusci Anne CPR-D is an adult CPR training manikin focusing on performance and skill in CPR and defibrillation actions during the scenario. The combination of the Micro-HeartSim® and SkillReporter™ modules allows comprehensive instructor-to-student debriefing and documentation of key events. Additionally, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

Resusci Anne Full-Body comes standard with non-articulating arms and legs. First Aid/Trauma Modules available, see page 22.
(Defibrillator not included.)

Resusci Anne CPR-D Manikin Includes:
Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carrying Case, Track Suit (Full-Body Models) or Jacket (Torso Models), 50 Resusci® Manikin Wipes, Directions for Use, SkillReporter unit with 1 roll of Printer Paper, Micro-HeartSim hand-held control unit, and Training Electrodes.

For more information on the SkillReporter unit, see page 8.

Resusci Anne® Q-CPR/D Training System

**Quality CPR training incorporating live defibrillation and Q-CPR® Technology**

Q-CPR is an exciting technology developed by Laerdal, the result of collaboration with many leading CPR research centers over recent years. Q-CPR is a clinical measurement and feedback tool that will have a major impact on the quality of CPR that is delivered by professional rescuers in the field, and is only available on the Philips HeartStart® MRx ALS Monitor.

- The Resusci Anne Q-CPR/D training system allows for training with the Q-CPR function on the HeartStart MRx defibrillator.
- The system allows for defibrillation, Q-CPR, and airway management training.
- The airway head is designed for controlled ventilations through use of the endotracheal tube, laryngeal mask airway, or bag-valve-mask ventilations.
- The Q-CPR Training Module provides ECG to the defibrillator and accepts shocks. It also provides ventilation data to the HeartStart MRx.
- ECG and shock response are controlled from the Micro-HeartSim module.
- With the use of the optional SkillReporter™ printer or the PC SkillReporting System, comprehensive debriefing documentation can be generated.
