

Strengthening the link between nursing education and simulation.

Introducing Nursing Scenarios for the SimMan® Patient Simulator

Enhance your simulation-based nursing courses by integrating 20 preconfigured scenarios into your curriculum

This package of basic and advanced scenarios includes 10 surgical and 10 medical scenarios that are designed to challenge students at all different levels. Cases range from obtaining vital signs, through recognizing and managing life threatening complications.

The scenarios package includes the following:

- Pre-programmed scenarios
- Patient information card
- Patient ID bands
- Data collection forms
- Physician orders
- “Simulation in Nursing Education” book
