Training and Therapy Solutions for Homeland First Responders
Laerdal is dedicated to helping Homeland First Responders prepare for and respond to all natural and manmade disasters. Our goal is to help you minimize the damage and loss of life, while maximizing the highest standard of patient care. To that end, Laerdal Medical is committed to creating and providing quality products and solutions for all of your Training and Therapy needs.

...so that when disaster does strike, you are ready with the necessary skills and equipment. This is as true for the military and disaster medical assistance teams (DMAT) as it is for EMS, Firefighters, Hospitals, Law Enforcement, and local, state and federal emergency management - including Homeland Security.

Proper Training is needed to effectively prepare for and provide total incident management, including weapons of mass destruction (WMD) response, special events, mass casualties, municipal public safety, and nuclear/biological/chemical (NBC) attack -- from the "Big One" to all the "little ones" that occur on a daily basis.

Therapy -- the therapeutic products and solutions used to implement the training for all military and civilian emergency response needs -- puts all the Training to good, lifesaving use. This holds true not only for acts of terrorism, but for the thousands of natural disasters and emergencies all First Responders battle every day. Training and Therapy, the best way to be prepared and ready for the unexpected.

Whether it is training for mass casualty events, hazardous environments, preparing the public for their roles in the civilian response movement, or equipping your teams with the emergency care products they truly need, we want to be your partner in the battle against manmade and natural disasters.

In addition to supplying the key Training and Therapy products for Homeland First Responders, we can customize a program that is individually tailored for your special needs, including but not limited to skills training, extrication, mass casualty, first aid, NBC, citizen training, CPR, airway management, and advanced cardiac life support. We will also assist you in sourcing funds, if applicable. Most important, our commitment and dedication to our customers is known throughout the emergency care industry.

For over 40 years, Laerdal Medical has developed and manufactured innovative Training and Therapy products for the pre-hospital, in-hospital and military markets worldwide. In fact, Laerdal’s flagship products, the Resusci® Anne CPR manikin and her family of training manikins, have helped train more than 250,000,000 potential responders around the world. Our mission is Helping Save Lives.

The Laerdal Team consists of more than 800 people worldwide, with superior alliance partners and an outstanding distributor network. In fact, Laerdal is one of the leading providers of emergency care solutions in the world. We strongly support Homeland First Responders and emergency managers, and we are honored to help you in your lifesaving work.

The majority of pre-hospital emergency care providers in America use Laerdal products on a regular basis.
Mass Casualty

Expect the best, but prepare for the worst.

Providers have always responded to accidents and disasters -- from train wrecks to hurricanes. But today, there is a different kind of disaster in the headlines. We now live in a world that has focused its attention on the threat of terrorism, including the possible use of nuclear, biological, and chemical weapons.

Whether manmade or natural, disasters often result in mass casualties. Laerdal simulation solutions are vital elements for MCI preparedness.

Being prepared for the unexpected is the best solution for saving lives in mass casualty incidents (MCI). Today, medical and emergency care professionals are realizing the tremendous rewards of training through patient simulation. The ability to simulate disasters and medical emergencies is key. Practicing the response is critical.

Laerdal provides a vast array of the training products and solutions that can be used to simulate virtually any scenario and individual skill.

Our new VitalSim™ manikins are durable and can be used for training advanced life support skills in the field. VitalSim provides the manikins with simulated ECG, sounds, blood pressure and pulses.

Laerdal has also developed two new products particularly geared to the possibility of chemical or biological attack: The Nuclear, Biological and Chemical (NBC) Module offers the ability to identify the effects of toxic gasses on the central nervous system by producing realistic, frothy fluids that emanate from the eyes, ears and nose. Our Smallpox Module provides you the ability to identify the effects of abnormal and normal skin reactions to the inoculation.

From pediatric to adult -- pre-hospital to in-hospital -- Laerdal can meet your needs for mass casualty training.

Smallpox Training Module
Identify normal and abnormal reactions to Smallpox vaccine and practice the skills required for inoculation.

NBC (Nuclear/Biological/Chemical) Training Module
Identify and respond to the symptoms of NBC exposure.

MegaCode Kelly VitalSim™ Advanced Manikin
The ALS manikin durable enough for advanced field exercises.

VitalSim™ Vital Signs Simulator
Ultimate flexibility and control of your patient scenarios.

MegaCode Kid VitalSim™ Manikin
Indispensable to any pediatric ALS course.

MegaCode Trauma Modules and Make-Up Kit
Set the stage for ultimate realism and scenarios that really make an impact!
Homeland security begins at home.

While we continue to enhance the training and response capabilities of traditional responders (military, police, fire and EMS), we cannot forget the everyday citizens who can be called upon to lend assistance in time of need. This group may be asked to help family, friends, or co-workers, or could be a part of organized groups such as Citizen Emergency Response Teams (CERT).

Laerdal can help you deal with the increased need for First Aid and CPR training with realistic and durable training products. Whether you are looking to increase your training equipment inventory or require assistance with a mass training event, Laerdal can help provide a solution to your specific needs.
Stifneck® Extrication Collars
Ready when you need them...
Stock up on Stifneck® and Stifneck® Select™ Extrication Collars and save space and money by ordering in compact cases. Preferred for over 20 years, Stifneck extrication collars remain the standard of care for suspected cervical spine injuries.

BaXstrap™ Spineboard
The board that meets your most demanding needs.
As a rescuer, you want your spineboard to be comfortable for your patient as well as being rigid and lightweight. You also want to store the board easily. The BaXstrap Spineboard provides these benefits and is one of the lightest boards on the market. The contoured design allows the board to nest trimly – 10 boards stacked together are only 18 1/3” inches thick. This unique feature also offers patients more comfort, making it less likely that they move around and aggravate their injuries.

Laerdal provides the total solution for emergency situations. Our products set the standard for emergency care, like the Laerdal™ Suction Unit, the Stifneck® Extrication Collar and the Laerdal™ Pocket Mask™, the number one CPR barrier device in the world.

Responders across America trust Laerdal’s spinal solutions: the BaXstrap™, our curved spineboard designed for patient comfort and safety; the Stifneck® Select™, our standard sizing method adjustable collar; the HeadBed™ II and StaBlok™, our disposable head immobilization devices.

Many of Laerdal’s quality products can be stored compactly, so you can have large quantities on hand whenever a disaster strikes.

Let Laerdal assist you with your airway management and immobilization needs.

Laerdal™ Suction Unit, Laerdal™ Compact Suction Unit and V-VAC™ Manual Suction Unit
Choose from the full-featured, compact, or hand-powered models.

The BAG™ Disposable Resuscitators
Performance and value...it’s in The BAG.

HeadBed™ II Head Immobilizer
Maximum immobilization with minimum storage requirements.

Thomas™ Endotracheal Tube Holder
State-of-the-art improvement over tape fastening methods.

Stifneck® Extrication Collars
Ready when you need them...
Stack up on Stifneck® and Stifneck® Select™ Extrication Collars and save space and money by ordering in compact cases. Preferred for over 20 years, Stifneck extrication collars remain the standard of care for suspected cervical spine injuries.

BaXstrap™ Spineboard
The board that meets your most demanding needs.

PneuSplint™ Air Splints
The Disposable Articulating Air Splint.

StaBlok™ Head Immobilizer
Easy to use, adjustable, comfortable, and stable.

Laerdal™ Pocket Mask™, the number one CPR barrier device in the world.

ONE OF THE WORLD’S LEADING PROVIDERS OF EMERGENCY CARE SOLUTIONS.

Therapy

Are you equipped to respond?
When disaster strikes, you must be ready to respond to far more victims than you would typically be called to care for. Yet, you still have the same mission of providing the best possible patient care. The manner in which you prepare your disaster equipment inventories will have a major impact on how well you can care for these patients.

Not only can we provide you with the industry’s leading training solutions, but we will help you put together the supplies you need, in the configurations you need, so you can respond quickly in a disaster situation.
Summary

Whenever the call for Homeland First Responders goes out, Laerdal goes along in the Training that responders have received and in the tools they carry with them. Our job is to make your job easier, and we will do whatever it takes to accomplish this goal.

Laerdal is committed to serving you before, during, and after your purchase. Our sales team will assist you with product information and demonstrations. Our Authorized Distributors are also located throughout the country for your convenience.

Customer Support has assigned specialized teams who will go the extra mile to take care of you as if you were our only customer.

Technical Support is committed to providing you high-quality Laerdal products operating at optimal efficiency. Preventive Maintenance and Service Plans are also available, as is Private Labeling of certain products.

Whether the need is in Mass Casualty, Citizen Training, Therapeutic Equipment or Emergency Care, we are ready to help when and if you need us. All you need to do is call 877-LAERDAL.
One of the World's Leading Providers of Emergency Care Solutions.

Laerdal Medical is dedicated to helping save lives with products, services and system solutions for CPR & AED Training, Airway Management, Advanced Life Support Training, Spinal Motion Restriction, Trauma, First Aid, and Patient Simulation.
