Laerdal®
helping save lives
HeartCode™ BLS
Interactive, self-directed learning program which completes the cognitive requirements of the AHA BLS for Healthcare Providers Course.

Program incorporates microsimulation technology which allows the student to assess and formulate treatment plans using actual patient scenarios. Provides students instant feedback and evaluation through intelligent debriefing. (See page 10-11 for further details.)

HeartCode™ ACLS
Interactive, self-directed learning program which completes the cognitive requirements of the AHA ACLS Course. Program incorporates microsimulation technology, which allows the student to access and formulate treatment plans using actual patient scenarios. Detailed debriefing screens allow learners to review their actions, both correct and incorrect with suggestions for improvement which enhance and support the learning objectives and knowledge acquisition. (See page 2-3 for further details.)

Learn Rhythm™ – Adult
Self-paced, eLearning course that introduces healthcare providers to the normal cardiac rhythms and teaches how to recognize basic cardiac arrhythmias in clinical practice.

Uses interactive simulation activities and animation to introduce the user to basic concepts in adult patient ECG recognition and help prepare them for their ACLS Coursework. (See page 3 for further details.)

Stroke Prehospital Care Online
For pre-hospital medical professionals and emergency medical services personnel in acute medical practice.

Course strengthens students’ decision making skills for treating stroke victims using EMS triage and transport protocols to improve the quality of pre-hospital treatment.

BLS for Healthcare Providers Online (Part 1)
For those who need BLS certification or recertification. Course includes a series of online modules covering adult, child and infant CPR sequences, including 21 optional review sections with 17 videos. (See page 13 for further details.)

Learn Rapid STEMI I.D.™
Designed to teach the base principles of the normal 12-lead ECG and identify a patient requiring rapid perfusion.

BLS Anytime for Healthcare Providers
A self-directed program that teaches the cognitive portion of the AHA BLS for Healthcare Providers Course using personal manikins, disposable resuscitators and practice-while-watching DVD for CPR skills practice.
Heartsaver® AED Anytime®
A self-directed learning program that effectively teaches the skills of CPR and AED use. The program was designed for companies that need or want to provide these lifesaving skills to their employees or designated first responders.
AED program incorporates microsimulation as part of the learning process, creating an intuitive learning environment for the user.
(See page 15 for further details.)

Heartsaver® First Aid Online (Part 1)
An online eLearning program including a series of modules that cover the required sequences for the AHA First Aid Course. The course covers first aid basics, medical emergencies, injury emergencies and environmental emergencies.
(See page 17 for further details.)

Heartsaver® First Aid Online with CPR & AED (Part 1)
An online eLearning course which includes a series of modules that cover all required sequences for the American Heart Association Heartsaver First Aid with CPR and AED Courses.
(See page 17 for further details.)

Family & Friends® CPR Anytime®
A personal learning program that effectively teaches the lifesaving skills of adult and child CPR in just 22 minutes. Educating individuals in your community can strengthen the chain of survival and potentially improve survival rates.
(See page 21 for further details.)

Infant CPR Anytime®
A personal learning program designed to teach the core skills of CPR and relief of choking in infants. With a personal manikin and skills practice DVD, anyone can learn how to respond during the first few minutes of an infant emergency.
(See page 22 for further details.)

Self-Directed Learning Benefits:
- Target new markets to grow your business
- Offer alternative training methods to appeal to a wide variety of learners
- No need to turn students away
- Can be used to supplement training by combining the classroom method with video self-instruction
- Additional revenue source – sell it to students to use during or after the class
- Eliminate classroom setup and cleanup with these personalized CPR kits
- Encourage your students to take it home and train other family members and strengthen the chain of survival (the “Multiplier Effect”)
- Scientifically proven to be as effective as teaching the core skills of CPR through the traditional classroom-style
Train and learn at home or in the classroom!

HeartCode™ ACLS

The Official American Heart Association Self-Directed ACLS eLearning Program

HeartCode ACLS is an interactive self-directed learning program which completes all cognitive requirements for the American Heart Association ACLS course. HeartCode ACLS includes all of the exams required for successful completion of the ACLS curriculum. Course completion consists of two separate elements: completing the computer-based cognitive portion and demonstrating skills to an AHA ACLS Instructor; or by using a voice-assisted manikin system. HeartCode ACLS can be used for initial or renewal certification.

HeartCode ACLS offers an alternative to the traditional course and is the only ACLS eLearning course that provides AHA certification!

- Reduce the costs associated with training
- Increase flexibility in your course offerings
- Provide students the opportunity to learn at their own pace with instant feedback and debriefing
- CME / CEH / CE credit provided by the AHA
- Emphasis on the team approach and the importance of high-quality CPR to patient survival
- Includes practical application to ECG rhythm recognition and pharmacology

HeartCode ACLS includes:
Ten interactive patient scenarios, pre-course self-assessment, team dynamics lesson, and full texts of the ACLS Provider Manual, 2005 AHA Guidelines for CPR and ECC, and ACLS Core Drugs.

ACLS certification or recertification in three easy steps:

Step 1. Successfully complete the Part 1 cognitive portion of the program including patient scenarios and multiple choice exam.

Step 2. Successfully complete the Part 2 skills portion using a voice assisted manikin system or demonstrating skills to an AHA ACLS instructor.

Step 3. Receive an AHA ACLS Provider card.

Three Use Models
1. Prepaid CD  2. Full system  3. Web-based via HealthStream™

1. HeartCode ACLS Anywhere Prepaid CD

Individual or Institution purchases the Part 1 Cognitive Software

80-1451 HeartCode ACLS Anywhere Prepaid CD .......... $120.00*
80-1458 HeartCode ACLS Anywhere,
License to Unlock Demo CD ................................ $120.00*
(Purchasing this license code allows you to unlock your
HeartCode ACLS Anywhere Demo CD to the full version.)

* Quantity discounts available. A skills test conducted by an AHA ACLS Instructor is required to
complete certification. Additional fees may apply for AHA instructor administered skills test.
2. HeartCode™ ACLS Full System = Cognitive + Manikin Skills

Cognitive portion (Part 1) and manikin skills (Part 2) completed with HeartCode ACLS full system software installed on a single PC or multiple PCs in computer lab.

3. Web-Based via HealthStream® Learning Platforms

Courseware completed via the Internet available through HealthStream Learning Platforms. List price is $120.00 per student. If you are currently using a Learning Management System other than the HealthStream Learning Center, you can access HeartCode ACLS via HealthStream Connect. Please ask your Laerdal or HealthStream sales representative for details on pricing, quantity discounts, skills manikin, and options to access the program through HealthStream.

Other web-based delivery options including www.laerdal.com and www.onlineaha.org will be available soon.

NEW! Learn Rhythm™ – Adult

Improve Adult ECG Rhythm Recognition with the official AHA eLearning ECG course

Learn Rhythm-Adult is a self-paced, eLearning course that introduces healthcare providers to normal cardiac rhythms and teaches them to recognize basic cardiac arrhythmias in clinical practice. This course is essential for healthcare professionals preparing for ACLS certification or requiring remediation in ECG recognition. Learn Rhythm Adult can also be implemented as an individual course for clinicians requiring basic ECG training or remediation.

- Designed to help students successfully complete ACLS certification or renewal
- Improves quality of patient care by assisting healthcare providers in diagnosing conditions quickly and accurately
- Offers a convenient alternative to traditional classroom training
- CME / CEH / CE credit provided
- Courseware completed via the internet
- Other web-based delivery options including www.laerdal.com and www.onlineaha.org will be available soon

Learn Rhythm-Adult ........................................................................................................ $49.95 per student

Please call your Laerdal or HealthStream Sales Representative for details on quantity discounts, ordering and delivery options.
Handbook of Emergency Cardiovascular Care for Healthcare Providers 2008

This new edition of the Handbook of Emergency Cardiovascular Care for Healthcare Providers incorporates the American Heart Association latest science Guidelines for CPR and ECC. Includes updated algorithms, information on therapeutic agents, stroke, and acute coronary syndromes. This 4-color, pocket-sized guide to emergency cardiovascular care is available in the popular 4 ¾” x 6 ¼”, spiral-bound format only.

For use as a quick reference for ECC healthcare provider instructors and students, personnel in emergency, intensive care, or critical care departments, and emergency medical care providers.

80-1484 ....................................................................................................................$15.95

ECC Guidelines for CPR and ECC

2005 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care.

Reprint of the 2005 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care. Updated guidelines reflect the new resuscitation science.

For ECC instructors, students, personnel in emergency, intensive care or critical care departments, and emergency medical care providers.

80-1009 ......................................................................................................................................................................................................$15.00

2005 Guidelines for First Aid

The 2005 Guidelines for First Aid were co-developed by the American Heart Association and the American Red Cross.

(Reprint of Part 14, First Aid, from the 2005 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care Circulation, December 13, 2005 issue.)

Intended for use by First Aid instructors and students, and personnel providing First Aid.

80-1019.........................................................................................................................................................................................................$3.50

Place your order online at www.laerdal.com
Advanced Cardiovascular Life Support

The American Heart Association’s Advanced Cardiovascular Life Support course is for healthcare providers who either direct or participate in the resuscitation of a patient, whether in or out of hospital. Through the ACLS course, providers will enhance their skills in the treatment of the adult victim of a cardiac arrest or other cardiopulmonary emergencies. ACLS emphasizes the importance of basic life support CPR to patient survival; the integration of effective basic life support with advanced cardiovascular life support interventions; and the importance of effective team interaction and communication during resuscitation.

ACLS Provider Manual

Designed to be used before class for preparation, in class as a workbook referencing relative topics, and as a reference book for the student after the class. Material such as Effective Resuscitation Team Dynamics and the 10 ACLS Core Cases are presented in a new formatting style that makes any topic easy to find. A student CD included with the text contains information on Airway Management, Core ECG Rhythms, ACLS, and Stroke. Also included are the required ACLS Precourse Checklist and 2 Pocket Reference Cards containing algorithms and information on Cardiac Arrest, Arrhythmias & Their Treatment, and Acute Coronary Syndromes & Stroke.

For emergency, intensive care, or critical care healthcare providers, such as Physicians, Nurses, Paramedics, Respiratory Therapists and other professionals who may need to respond to a cardiovascular emergency.

ACLS Instructor Manual

Includes detailed lesson “maps” to aid in conducting the ACLS Courses (72 lesson maps for the ACLS Course and 37 lesson maps for the ACLS Renewal Course). The courses are designed to be instructor-led using large group interaction, small group interaction, and small group skill testing stations. An instructor CD, containing case-based scenarios and administrative precourse and course materials is included with the manual to provide support in conducting an ACLS Course.

ACLS Instructor Package

The instructor package provides educational materials to teach the ACLS course. The package includes copies of the ACLS Provider Manual (80-1088), which includes the student CD, 2 Pocket Reference Cards, the required ACLS Precourse Checklist, and the ACLS Instructor Manual (80-1086), which includes 72 Lesson Maps for the ACLS Course and 37 Lesson Maps for the ACLS Renewal Course and an instructor CD, as well as a set of 3 Emergency Crash Cart Cards (80-1083); the ACLS Poster Set (80-1082); 2 ACLS DVDs (80-1090); and a stopwatch. For use by instructors of the ACLS Course.

Call our dedicated Customer Service Representatives at 888-LMC-4AHA (562-4242)
ACLS Video

The ACLS video presents video segments for the updated ACLS Course and for the ACLS Renewal Course. The ACLS Course video has six easy to navigate sections. Two segments demonstrate skills for BLS Practice and Airway Management. Other segments present Megacode and Team Resuscitation Concepts, the BLS Primary Survey and ACLS Secondary Survey approaches to evaluating a patient, and how to manage a patient with Acute Coronary Syndrome or Acute Ischemic Stroke. Running time for the ACLS Course video is 137 minutes. The video is closed captioned.

80-1090 DVD Format..............................................................................................................................................................................................................$65.00
80-1091 VHS Format.............................................................................................................................................................................................................. $80.00

ACLS Pocket Reference Card Set

This set of pocket reference cards contains two folding, four-color, 4" x 6 ½" cards. Cardiac Arrest Arrhythmias & Their Treatment card is a two-panel card that provides algorithms common to arrhythmias and appropriate treatment. Acute Coronary Syndromes & Stroke is a four-panel card that provides algorithms common to acute coronary syndromes and stroke, and appropriate treatment protocols.

80-1092 ....................................................................................................................................................................$10.00

ACLS Poster Set

The (22" x 34") posters are intended for use in the classroom. Each set contains one each of the ACLS algorithms: BLS Adult Algorithm, Bradycardia Algorithm, Tachycardia Algorithm, ACS Algorithm, Stroke Algorithm, Pulseless Arrest Diagram, and 12-Lead ECG, and two each of the Pulseless Arrest Algorithm.

80-1082 ..........................................................................................................................................................................................................................Set of 9 / $45.00

ACLS 12-Lead ECG Poster

This (22" x 34") ACLS poster illustrates the localization of ischemia, injury, or infarct using the 12-lead ECG in relation to coronary artery anatomy.

80-1081.................................................................................................................................................................................................$12.00

ACLS Treatment Sequences for Pulseless Arrest Poster

This new ACLS poster, in a larger 22" x 34" size illustrates the treatment sequences for Ventricular Fibrillation/Pulseless Ventricular Tachycardia, and Asystole and Pulseless Electrical Activity for ACLS and PALS. Packaged singly in a mailing tube for ease of display without creases.

For use by instructors in the ACLS classroom setting or as quick reference information for a healthcare site.

80-1089 .................................................................................................................................................................... $12.00

ACLS Algorithm Emergency Cart Cards

This card set (8 ½" x 11") contains the adult algorithms from the 2005 AHA Guidelines for CPR and ECC: BLS Adult Algorithm, Pulseless Arrest Algorithm, Bradycardia Algorithm, Tachycardia Algorithm, ACS Algorithm, and Stroke Algorithm.

80-1083 ............................................................................................................................................................................................................. Set of 3 / $15.00

ACLS SimMan® Scenarios

The ACLS SimMan Scenarios are pre-programmed scenarios for the Laerdal SimMan Patient Simulator, which is used to create simulations to teach, reinforce, and test the American Heart Association’s ACLS algorithms. The ACLS SimMan Scenarios contain 31 different patient cases that address major learning objectives of the AHA’s ACLS Course.

80-1459 ........................................................................................................................................................................ $4,194.00
ACLS Resource Text for Instructors & Experienced Providers

The ACLS Resource Text is intended to provide ACLS instructors with the material to understand and explain the ACLS core information. It is intended to develop the understanding, skills, and depth of background knowledge that experienced providers are expected to possess. Part 1 provides rationale, background information, and supplementary data on basic ACLS core material. Part 2 provides additional and advanced ACLS material to increase the provider’s depth of understanding for more complicated and special resuscitation situations.

80-1085 (Replaces 70-2500) .............................................................................................................................. $34.95

Instructor Manual: ACLS for the Experienced Provider

Designed for a case-based, group-interactive format, this 2004 revision of focused resuscitation topics provides a challenging and informative alternative for ACLS renewal.

70-2294 .......................................................................................................................................................................................................................... $75.00

ECG & Pharmacology

Specifically designed to address a key knowledge gap in Electrocardiogram (ECG) and Pharmacology, the American Heart Association’s adult ECG & Pharmacology Course is a new program focused on specific ECG recognition skills and drug treatment knowledge. The course is a pre-course option for ALCS students who need to improve after the ACLS pre-course self-assessment test.

ECG & Pharmacology Student Workbook

The ECG & Pharmacology Course presents information on basic electrophysiology, normal ECG measurements, basic arrhythmias, basic ACLS drugs, usage and routes of administration during cardiovascular emergencies, and how to integrate basic drug pharmacology into ACLS algorithms. The course is divided into two modules of slide presentations, one for ECG and one for Pharmacology, which can be taught together or separately.

A certificate of completion will be available to providers upon successful completion of the course. The course is intended for credentialed healthcare providers.

80-1467 .................................................................................................................... $12.95

ECG & Pharmacology Instructor CD

DVD includes information on basic electrophysiology, normal ECG measurements, basic arrhythmias, basic ACLS drugs, usage and routes of administration during cardiovascular emergencies, and how to integrate basic drug pharmacology into ACLS algorithms.

The adult ECG & Pharmacology Course is divided into two modules of slide presentations, one for ECG and one for Pharmacology, which can be taught together or separately.

Designed for experienced instructors with extensive knowledge and educational experience in teaching basic arrhythmias.

80-1448 .................................................................................................................... $20.00

NRCPR®

What is the NRCPR?

The AHA’s National Registry of Cardiopulmonary Resuscitation was developed by experts in emergency medicine and cardiology to collect data about in-hospital resuscitation events. The registry’s goal is to provide a centralized, efficient, consistent means for collecting and analyzing data on in-hospital resuscitations. As a member of the registry, the data you provide will be kept strictly confidential. You and your institution can be part of this vital effort to gather data and improve in-hospital resuscitation throughout America.

For more information about the NRCPR, or to join, please call 888-562-4242.

The Airway Management Student Guide

The Airway Management Student Guide is designed for use by students before, during and after the course as a resource. The text contains illustrations of airway anatomy and airway skills. The guide also contains Skills Station Competency checklists for the 5 airway modules:

1. Bag-Mask Ventilation and Airway Adjuncts
2. Laryngeal Mask Airway
3. Esophageal-Tracheal Combitube®
4. Endotracheal Tube
5. Impedance Threshold Device

The modules cover basic and advanced adult airway skills but are not for students who require airway skills for rapid sequence intubation or surgical procedures. Modules are designed for facilitator-led, small-group interaction using the video and small-group skills testing stations.

ECG ACS Ruler

The ECG ACS Ruler is a tool for acute coronary syndrome (ACS) electrocardiogram (ECG) analysis and recognition. It is an aid that:

- Graphically defines ACS ECG findings for heart injury, ischemia, and infarction
- Gives directions how to measure ST deviation with a transparent "window" grid
- Identifies infarction location with ECG graphics for specific leads for anterior, inferior and lateral infarct
- Lists normal values for PR, QRS and QT; intervals
- Has ruler markings to estimate heart rate; inch; and cm

STEMI Provider Manual with ECG ACS Ruler

The STEMI Provider Manual and the ECG (Electrocardiogram) ACS (Acute Coronary Syndromes) Ruler are key products to address the ongoing need to train emergency professionals in the early recognition of STEMI.

The STEMI Provider Manual is a self-study booklet that enables out-of-hospital and emergency department personnel to increase the assessment, diagnosis, treatment and survival rates for STEMI patients.

The ECG ACS Ruler is another tool created to aid out-of-hospital and emergency department personnel with reading, analysis and recognition of electrocardiograms.

HeartCode™ BLS

An Official American Heart Association Self-Directed, Comprehensive eLearning Program

HeartCode BLS is an interactive self-directed learning program which completes all cognitive requirements for the American Heart Association BLS for Healthcare Providers Course. Course completion consists of two separate elements: completing the computer-based cognitive portion, and demonstrating skills to a certified AHA BLS Instructor or by using a voice-assisted manikin system. HeartCode BLS can be used for initial or renewal certification.

HeartCode BLS offers a convenient, flexible means for institutions to provide a fun, challenging way to keep staff current on their AHA BLS certification.

- Maintain a standardized and high level of professional competency among staff
- Motivate staff – improve compliance to maintain BLS certification
- Increase flexibility in your course offerings
- Provide students instant feedback and evaluation through intelligent debriefing
- Self-paced instruction to accommodate different learning styles
- Get an objective measure of staff’s competency with sensorized adult and infant manikins that measure CPR skills

BLS certification or recertification in three easy steps:

Step 1. Successfully complete the Part 1 cognitive portion of the program including two patient scenarios and multiple choice exam

Step 2. Successfully complete the Part 2 skills portion using a voice-assisted manikin system or skills tests administered by an AHA BLS instructor.

HeartCode BLS includes:

BLS lessons, two interactive patient scenarios, one adult and one infant case, and full text of the AHA BLS for Healthcare Providers Student Manual.

For more information on these and other Laerdal products, visit www.laerdal.com.
Three Use Models

1. Cognitive only  
2. Full system  
3. Web-based via HealthStream®

1. HeartCode BLS Cognitive Only

Cognitive portion (Part 1) completed with HeartCode BLS cognitive software installed on a single PC or multiple PCs using a web or intranet server.

- **80-1483** HeartCode BLS Cognitive License  
  $31.00 per student*

- **80-1481** HeartCode BLS Cognitive Software Kit  
  FREE

* Introductory pricing and quantity discounts available. A skills test conducted by an AHA BLS Instructor is required to complete certification. Additional fees may apply for AHA instructor administered skills test.

2. HeartCode BLS Full System = Cognitive + Manikin Skills

Cognitive portion (Part 1) and manikin skills (Part 2) completed with HeartCode BLS Full System software installed on a single PC or multiple PCs using a web or intranet server.

- **80-1483** HeartCode BLS Cognitive License  
  $31.00 per student*

- **80-1429** HeartCode BLS Skills License  
  $28.00 per student*

- **80-1078** HeartCode BLS Cognitive and Skills Software Kit  
  FREE

* Introductory pricing and quantity discounts available. Call your Laerdal sales representative about pricing and skills manikin details for your system purchase.

3. Web-Based via HealthStream® Learning Platforms

Courseware completed via the Internet available through HealthStream Learning Platforms. List price for the cognitive and skills software is $59.00 per student. If you are currently using a Learning Management System other than the HealthStream Learning Center, you can access HeartCode BLS via HealthStream Connect. Please ask your Laerdal or HealthStream sales representative for details on pricing, quantity discounts, skills manikins, and options to access the program through HealthStream.

Other web-based delivery options including www.laerdal.com and www.onlineaha.org will be available soon.

For more information on these and other Laerdal products, visit www.laerdal.com.
The BLS Healthcare Providers Course is designed to provide a wide variety of healthcare professionals the ability to recognize several life-threatening emergencies, provide CPR, use an AED, and relieve choking in a safe, timely and effective manner. The course is intended for certified or noncertified, licensed or unlicensed healthcare professionals.

BLS for Healthcare Providers

This text for the BLS for Healthcare Providers Course covers core material such as adult and pediatric CPR (including two-rescuer scenarios and use of the bag mask), foreign-body airway obstruction, and automated external defibrillation. A student CD, included with the text, contains supplemental information for the interested student on topics such as stroke, cardiac arrest, and special resuscitation situations.

80-1010 ................................................................. $11.00

BLS for Healthcare Providers Instructor Manual

This text, provides the instructor with detailed lesson maps and information for teaching the BLS for Healthcare Providers Course as well as the BLS for Healthcare Providers Renewal Course. The book is approximately 38 pages and is shrink-wrapped with approximately 100 pages of 4-color lesson maps. The manual is formatted as an 8 ½” x 11”, loose-leaf, 3-hole-punched text that will fit in the new AHA Instructor Binder.

80-1011 ................................................................................. $30.00

BLS for Healthcare Providers Video (VHS Format)

This VHS-format video for the BLS for Healthcare Providers Course presents demonstrations of emergency cardiovascular care procedures for adults and children. Demonstrations of skills such as one-rescuer and two-rescuer CPR, rescue breathing, and recognizing and relieving foreign-body airway obstruction are included. Running time is approximately 95 minutes. Closed-captioned.

80-1012 ................................................................................. $80.00

BLS for Healthcare Providers Basic Life Support & Renewal Course Video (DVD Format)

This DVD-format video presents content for the BLS for Healthcare Providers Course and the BLS for Healthcare Providers Renewal Course in the “practice-while-watching” (PWW) format. Demonstrations of skills such as one-rescuer and two-rescuer CPR, rescue breathing, and recognizing and relieving a foreign-body airway obstruction are included. Running time for the BLS for Healthcare Providers Course is approximately 95 minutes and 60 minutes for the Renewal Course. Closed-captioned.

80-1013 ................................................................................. $65.00
BLS for Healthcare Providers Renewal Course Video (VHS Format)

The VHS-format video presents content for the BLS for Healthcare Providers Renewal Course in the “practice-while-watching” (PWW) format. Demonstrations of emergency cardiovascular care procedures for adults and children, one-rescuer and two-rescuer CPR, rescue breathing, and recognizing and relieving foreign-body airway obstruction. Running time is approximately 60 minutes. Closed-captioned.

80-1014....................................................................................................................$70.00

BLS for Healthcare Providers Instructor Package

The Instructor Package provides educational materials to teach the BLS for Healthcare Providers Course. The package contains: 1 copy of the Instructor Manual: BLS for Healthcare Provider that includes Lesson Maps and an Instructor CD; 1 BLS for Healthcare Provider DVD-format video. Running time for the initial course video is 95 minutes and 60 minutes for the renewal course video. A copy of the BLS for Healthcare Providers student manual, a stopwatch, and a set of 4-color, 17” x 22” posters for Healthcare Providers (CPR and AED for the Adult, CPR and AED for the Child, CPR for the Infant, Rescuing the Choking Adult and Child, and Rescuing the Choking Infant) are also included.

80-1016....................................................................................................................$80.00

Healthcare Provider: Poster 5-Pack

The package of healthcare provider posters includes 1 each of CPR and AED for the Adult, CPR and AED for the Child, CPR for the Infant, Rescuing the Choking Adult and Child, and Rescuing the Choking Infant. The posters are four-color and 17” x 22” in size. For healthcare providers as a helpful reminder of the steps for CPR, AED use, and relieving airway obstruction.

80-1020....................................................................................................................$15.00

BLS for Healthcare Provider Online (Part1)

This updated release of the Web-based eLearning product includes a series of modules that cover all required sequences for an American Heart Association (AHA) BLS for Healthcare Provider Course. Participants also complete the AHA Healthcare Provider exam online.

80-1055....................................................................................................................$17.50

Stroke Prehospital Care Online

The American Heart Association’s Stroke Prehospital Care online training module consists of four interactive cases that lead participants through patient encounters. Each case presents a patient with stroke-related complaints and prompts participants to make treatment decisions. In the scenarios, each patient’s clinical status varies, based on the timing and accuracy of participant answers. Each case ends with a summary of key points. The stroke Prehospital Care course is an online course designed to increase prehospital providers’ knowledge about the two types of stroke and demonstrate potential stroke-related complaints. This course provides Continuing Education Accreditation for Emergency Medical Services and is CECBEMS approved for 1.25 Advanced CEHs. (Email address required.)

80-1468 (Replaces 70-2253).......................................................................................$19.95

Algorithm for Suspected Stroke and Prehospital Stroke Scale Card

This card, which illustrates the Suspected Stroke Algorithm on one side and the Cincinnati Prehospital Stroke Scale on the other, has been updated with the 2005 AHA Guidelines science. It is available as a two-sided, laminated, 4 ½” x 6” four-color card. The card is pocket-sized for ease of use. For use by emergency medical technicians and healthcare providers who need a quick reference to the Suspected Stroke Algorithm and the Cincinnati Prehospital Stroke Scale.

80-1059 ....................................................................................................................Set of 25 / $15.00
The Heartsaver CPR Course teaches CPR and relief of choking in adults and children, and infant CPR and relief of choking, and use of barrier devices for all ages. For those who have a duty to respond to a cardiac emergency because of job responsibilities or regulatory requirements. Designed for employee training at companies, corporations, businesses or other entities.

**Heartsaver® CPR Student Workbook**

The student workbook for the Heartsaver CPR Course includes sections on CPR and relief of choking in adults and children, infant CPR and relief of choking. Heartsaver® AED Anytime™ Personal Learning Program

Heartsaver AED Anytime is an innovative program that allows students to learn Adult CPR skills in under 30 minutes, and how to use an AED device in approximately 45 minutes. With Heartsaver AED Anytime, CPR and AED skills can be learned by students individually, at their own pace, or in a group setting.

The program teaches the core skills of CPR and AED utilizing a 28-minute DVD, a personal manikin (Mini Anne™) and the Heartsaver AED Anywhere™ CD. The course includes adult and child (optional) CPR and AED. Additional lessons include the use of barrier devices and relief of choking. The Heartsaver AED Anytime program allows for flexibility in course delivery. The program was designed to be offered in a group or independent setting. Students complete the CPR Skills Practice DVD, Heartsaver AED Anywhere software, and an adult CPR skills test with an AHA instructor or a skill reporter manikin.

Each Heartsaver AED Anytime Kit includes:

- Mini Anne™ CPR Training Manikin
- CPR Skills Practice DVD
- Interactive Heartsaver AED Anywhere™ CD
- Heartsaver AED Student Workbook
- Personal Pocket Mask™ and Gloves
- Mini Anne Spare Lung and Resusci Manikin Wipes

80-1076 Heartsaver AED Anytime Personal Learning Program $69.95
80-1075 Philips HeartStart Version – Heartsaver AED Anytime Personal Learning Program $69.95
80-1439 Philips HeartStart Version – Heartsaver AED Anywhere™ CD (Software only) $33.95

*Training Center Code must be provided for purchase. Requires a skills check for completion.

Heartsaver® AED Anytime Product Information Sheet

Includes a product description, steps for completing the course, kit contents, and additional program features and benefits.

80-1123 ..........................................................................................................................................Set of 25 / $8.00
Heartsaver® First Aid

The Heartsaver First Aid Course teaches how to manage illnesses and injuries in the first few minutes until professional help arrives. Course content includes General Principles, Medical Emergencies, and Injury Emergencies. Optional topics include CPR and AED, and Environmental Emergencies for those who have a duty to respond to a first aid or cardiac emergency because of job responsibilities or regulatory requirements. Designed for employee training at organizations and workplaces of all types.

Heartsaver® First Aid Student Workbook

The student workbook contains three core modules (General Principles, Medical Emergencies, and Injury Emergencies) and an optional module (Environmental Emergencies) for the Heartsaver First Aid Course. The modules contain information on how to manage illnesses and injuries in the first few minutes until professional help arrives.

Shrink-wrapped with the workbook are the Heartsaver First Aid Quick Reference Guide (80-1057) and a CD containing supplemental information for the student.

80-1042 ...............................................................................................................$8.50

Heartsaver® First Aid Video

The video presents content for all modules of the Heartsaver First Aid Course. Skills are presented in hands-on practice sessions in the new “practice-while-watching” (PWW) format. Running time is approximately 207 minutes. Closed-captioned.

Heartsaver® and Family & Friends® Instructor Manuals

80-1077 ...............................................................................................................$45.00

Heartsaver® First Aid Quick Reference Guide

This durable fold-out booklet, is designed to provide critical lifesaving information to care for a victim of an illness or injury until EMS arrives. The card serves as a quick reference to first aid signs and actions for those who have a duty to respond in the workplace as well as for the general public. The card is included with the student workbooks (Heartsaver First Aid and Heartsaver First Aid With CPR and AED).

80-1057 ...............................................................................................................$5.00

ONLINE COURSES

Heartsaver® First Aid Online Part 1

This web-based eLearning product provides Part 1 of the online course. Part 1 includes a series of modules that cover all required sequences for an American Heart Association (AHA) Heartsaver First Aid Course. Part 2 is hands-on skills session with an AHA instructor.

80-1095 ...............................................................................................................$25.00

Heartsaver® First Aid Online with CPR & AED Part 1

This web-based eLearning product provides the cognitive portion of the overall 3-part course. Part I includes a series of modules that cover all required sequences for an American Heart Association (AHA) Heartsaver First Aid with CPR & AED Course. Participants also complete the AHA Heartsaver First Aid review questions online. The Part 2 hands-on skills session and Part 3 skills test are arranged with an AHA instructor.

80-1461 ...............................................................................................................$35.00
Heartsaver® Pediatric First Aid

The Heartsaver Pediatric First Aid Course teaches how to manage illnesses and injuries in a child in the first few minutes until professional help arrives. Topics include First Aid Basics, Medical Emergencies, Injury Emergencies, Environmental Emergencies, Optional First Aid Topics, and CPR and AED.

Intended for those involved in childcare who have a duty to respond to a first aid emergency because of job responsibilities or regulatory requirements, such as childcare workers, teachers, foster care workers, camp counselors, youth organizations, and coaches for children's sports organizations. Designed to meet state regulatory requirements for childcare workers in all 50 states.

Heartsaver® Pediatric First Aid Student Workbook

This student workbook for the credentialed Heartsaver Pediatric First Aid Course and is for those with a duty to respond to a first aid emergency. The workbook is shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (80-1002), the Adult CPR & AED Reminder, the Child & Infant CPR & AED Reminder, and a CD containing supplemental information and video clips.

Included are six modules: First Aid Basics, Medical Emergencies, Injury Emergencies, Environmental Emergencies, and Adult CPR & AED. An optional First Aid Module to meet regulations for day care centers.

80-1001 .......................................................... $13.95

Heartsaver® Pediatric First Aid Quick Reference Guide

This durable, 4-color, 4” x 6 ½” guide, color-coded by topic, is designed to provide critical lifesaving information to care for a child or infant victim of an illness or injury until Emergency Services arrive.

The guide serves as a quick reference to first aid signs and actions for those in the workplace who have a duty to respond as well as for the general public. The guide is included with the student workbook Heartsaver Pediatric First Aid (80-1001) and is also sold separately.

80-1002 .................................................................. $5.00

Heartsaver® Pediatric First Aid Video Set (VHS Format)

This three video set presents content for all modules of the Heartsaver Pediatric First Aid Course in the “practice-while-watching” (PWW) format. The video is sold only as a set and includes presentations and skills demonstrations, on core and optional course topics, and allows for hands-on practice sessions. Total running time is approximately 250 minutes. Closed-captioned.

80-1003 ................................................................. 3-Video Set / $100.00

Heartsaver® Pediatric First Aid Video Set (DVD Format)

This video presents content for all modules of the Heartsaver Pediatric First Aid Course in the “practice-while-watching” (PWW) format. The video includes presentations and skills demonstrations, on core and optional course topics, and allows for hands-on practice sessions. Running time is approximately 250 minutes. Also included is the video for the Family & Friends First Aid for Children community program. Running time is approximately 40 minutes. Closed-captioned.

80-1007 ............................................................... $90.00

Heartsaver® Child & Infant CPR Wallet Card

This useful card illustrates the steps for child and infant CPR. Designed to fit easily into a wallet or purse, it serves as a helpful reminder of the steps of child and infant CPR for the general public and for the non-healthcare provider who has a duty to respond to a cardiac emergency.

80-1407 ............................................................. Set of 100 / $10.00

Have questions? Call us at (888) LMC-4AHA
Heartsafer® CPR in Schools®

The Heartsafer CPR in Schools Course, tailored to middle and high school students, teaches CPR and AED use, relief of choking in adults and children, and infant CPR and relief of choking. The course is intended for middle and high school students seeking a credential in CPR and AED.

The course design appeals to students through illustrations of teens and a unique training video featuring interviews with teens and edgy video footage.

Heartsafer® CPR in Schools® Student Workbook

The student workbook for the Heartsafer CPR in Schools Course contains updated content presented in a new formatting style that makes any topic easy to find. Many illustrations are new or updated in this 50-page, 4-color, 8 1/2” x 11” student workbook. The workbook includes sections on CPR and AED use, relief of choking in adults and children, and infant CPR and relief of choking.

The student workbook is shrink-wrapped with the Adult CPR & AED Reminder; the Child & Infant CPR & AED Reminder; and a CD containing supplemental information and video clips to refresh the student in CPR and AED skills. For students requiring a credential for CPR and AED.

Family & Friends® CPR Anytime® Personal Learning Program

CPR Anytime is a personal learning product that teaches lay people, in the comfort of their own homes, the core skills of Adult and Child CPR in just 22 minutes. It’s the perfect CPR education tool to help you reach individuals in your communities who do not require a credentialed course and who do not traditionally enroll in current classroom-type courses.

Family & Friends CPR Anytime program can be used as a personal learning program by individuals, for school programs, or in the workplace.

- Learn the core skills of CPR in the comfort of your own home in just 22 minutes
- Kit contains everything you need to learn how to recognize and respond to a sudden cardiac arrest emergency
- Learning CPR in a “practice-while-watching” (PWW) format can be entertaining, and skills are better retained
- User can learn CPR skills with family and friends
- Kits can be used with large groups or individually
- Can be used to learn both Adult and Child CPR
- DVD includes instruction in English and Spanish

Each Family & Friends CPR Anytime Kit includes:

Mini Anne™ CPR Training Manikin, CPR Skills Practice DVD, AHA Family & Friends CPR Booklet, Mini Anne Spare Lung, Manikin Wipes (2), and Directions for Use (printed inside the box.)

“Learners who use these kits perform at least as well as – and sometimes better than – those trained in a traditional CPR course.”

Roppolo et al, unpublished data 2006
Infant CPR Anytime® Personal Learning Program

The Infant CPR Anytime® kit is a simple, “practice-while-watching” (PWW) format that an entire family can use to learn how to respond during the first few minutes of an infant emergency. Train the whole family and increase the chances of survival for an infant.

Infant CPR Anytime benefits you and your community!

- **Skills Efficacy** Infant CPR Anytime teaches the core skills of CPR and relief of choking, using video self-instruction, in just 22 minutes
- **Flexibility** Allows families and friends to learn skills anytime, anywhere, and at a pace that is convenient to their own individual learning style
- **Multiplier Effect** The Infant CPR Anytime kit can be shared with others so that lifesaving CPR skills are passed along to family and friends
- **Latest Science** Infant CPR Anytime uses the most current resuscitation science from the 2005 American Heart Association Guidelines for CPR and ECC
- **Research-Proven** Incorporates the American Heart Association’s research-supported “practice-while-watching” educational methodology for learning the core skills of infant CPR
- **Cultural Diversity** Infant CPR Anytime comes in 2 versions; one with a light skin Mini Baby and one with a dark skin Mini Baby

Each Infant CPR Anytime Kit includes:

- Mini Baby™ CPR Training Manikin
- CPR Skills Practice DVD
- two Fold-out Quick Reference Guides in English and Spanish
- Directions for Use
- Manikin Wipes (2)
- Mini Baby Spare Lung

80-1403  Infant CPR Anytime Personal Learning Program (Light Skin) $34.95
80-1420  Infant CPR Anytime Personal Learning Program (Dark Skin) $34.95
The goal of the American Heart Association Pediatric Advanced Life Support Course is to aid the pediatric healthcare provider in developing the knowledge and skills necessary to efficiently and effectively manage critically ill infants and children, resulting in improved outcomes. Skills taught include recognition and treatment of infants and children at risk for cardiopulmonary arrest; the systematic approach to pediatric assessment; effective respiratory management; defibrillation and synchronized cardioversion; intraosseous access and fluid bolus administration; and effective resuscitation team dynamics. Designed for any healthcare provider who might encounter pediatric patients in their profession.

**PALS Instructor Package**

The instructor package provides educational materials to teach the PALS Course. The package contains the PALS Provider Manual and PALS Course Guide (80-1434), which includes the student CD, Pocket Reference Card, and the required PALS Precourse Checklist. A copy of the PALS Instructor Manual (80-1410) with 88 Lesson Maps for the PALS Course and 49 Lesson Maps for the PALS Renewal Course, PALS Scenario Cue Cards, and an instructor CD are included as a part of the package. Also included are the PALS Poster Set (80-1413), two PALS DVDs (80-1409), and a stopwatch.

80-1411.................................................................$160.00

**PALS Course Guide**

This course guide is designed to be used for class preparation and as a student workbook referencing relevant topics during class. A student CD, included with the text, contains the precourse self-assessment, practice cases, and supplemental information for student preparation on topics such as Respiratory Management, Vascular Access, ECG Basics, and Pharmacology. Also included with the guide are the PALS Precourse Checklist and PALS Pocket Reference Card, which contains frequently needed information such as drugs used in Pediatric Advanced Life Support.

80-1412.................................................................Set of 5 / $40.00

**PALS Instructor Manual**

The instructor manual includes detailed lesson “maps” to aid in conducting the PALS Courses (88 lesson maps for the PALS Course and 49 lesson maps for the PALS Renewal Course). The courses are designed to be instructor-led using large groups, small group interaction, and small group skills testing stations. An instructor CD containing administrative precourse and course materials is included with the manual to provide support in conducting a PALS Course.

80-1410.................................................................$38.00

**PALS Video**

The PALS video contains two video segments. One segment depicts the cognitive and psychomotor skills of the PALS Course. The second segment presents video clips to facilitate the group assessment discussions that precede the simulations for the 12 core cases. Running time for the video is approximately 85 minutes. The video is closed-captioned.

80-1409 DVD Format ............................................$65.00
80-1416 VHS Format ............................................$80.00

**PALS Pediatric Assessment Flowchart Poster**

The PALS poster, in a larger 22” x 34” size and printed on durable paper, illustrates the sequences for assessing a pediatric patient. For use by instructors in the PALS classroom setting or as quick reference information for a healthcare site.

80-1447.................................................................$12.00

**PALS Product Information Sheet**

The PALS product information sheet highlights the features and benefits of the AHA’s PALS Course. It includes a course description, intended audience, materials needed for the course and more.

The PALS product information sheet is intended for use by AHA field staff, Training Centers, Distributors/Partners and others to promote the course.

80-1144.................................................................Set of 25 / $3.50
**PALS Course Guide and Provider Manual**

This all-inclusive bundle of the two PALS student texts provides the PALS student with comprehensive information for the PALS Course. The Course Guide is designed to be used for class preparation and as a workbook during the course. A student CD, included with the text, contains the precourse self-assessment, practice cases, and supplemental information to help the student prepare for the course. Also included with the Course Guide are the PALS Precourse Checklist and PALS Pocket Reference Card.

The PALS Provider Manual contains more in-depth information on topics for pediatric resuscitation such as Recognition and Management of Respiratory Distress and Failure; Recognition and Management of Shock, and Pharmacology.

80-1434..........................................................Set / 35.00

---

**PALS Pocket Reference Card**

This folding, four-color, 4” x 6½” pocket reference card contains information specific to pediatric advanced life support. Included are Vital Signs in Children; Modified Glasgow Coma Scale for Infants and Children; Summary of BLS ABCD Maneuvers for Infants, Children, and Adults; Drugs Used in Pediatric Advanced Life Support; Bradycardia with a Pulse Algorithm; Algorithm for Pediatric Tachycardia with Pulses and Poor Perfusion; Pulseless Arrest Algorithm; Septic Shock Algorithm; and Post-Arrest Treatment of Shock and Maintenance Fluid Requirements. The card is a joint project of the American Association of Critical-Care Nurses and the American Heart Association.

80-1414..........................................................$6.00

---

**PALS Poster Set**

This set of twelve 4-color PALS posters, (22” x 34”), is intended for use in the classroom. Each set contains one each of the PALS algorithm and flowchart posters.

80-1413..........................................................Set of 12 / $45.00

---

**PALS Emergency Cart Card Set**

The card contains algorithms and flowcharts used in the PALS Course. Algorithms included are Bradycardia with a Pulse, Pediatric Tachycardia with Pulses and Poor Perfusion, Pulseless Arrest; Septic Shock; and Postarrest Treatment of Shock and Maintenance Fluid Requirements. Flowcharts included are Pediatric Assessment; Recognition of Respiratory Problems; Management of Respiratory Emergencies; Recognition of Shock; and Management of Shock.

For use by instructors in the PALS classroom setting or as quick reference information for a healthcare site. May also be used on crash carts.

80-1408..........................................................Set of 6 / $15.00

---

**PALS Tabletop Flip Chart**

This 12 ½” x 18” Flip Chart is an optional instructor tool intended to aid the instructor in facilitating the small group simulations in the PALS Course. It contains the 12 core case scenarios, including an image of the child from the corresponding video segment and the appropriate algorithms or flowcharts. The front of the chart cues the student with appropriate flowcharts or algorithms, and the back has the scenario description and suggested discussion points for the instructor.

80-1435..........................................................$79.95

---

**Coping with the Death of a Child**

A continuing education self-study course consisting of a 16-page booklet and a 14-minute video. Provides information on coping with the death of a child and is designed to assist healthcare providers.

70-2254   VHS Format........................................$20.00
70-2258   DVD Format........................................$20.00

---

**Pediatric Status Epilepticus**

The goals of this module are to recognize the problem, appropriately assess SE, describe initial treatment, and avoid overly-aggressive therapies that have potential for harm.

70-2302..........................................................$45.00

---

**Catastrophic Illness Presenting with Common Chief Complaints**

An interactive case-based module intended to be taught in a small group format. PowerPoint® presentation on CD.

70-2285..........................................................$45.00

---

**Pediatric Intraosseous Access Video**

This short, 10-minute video focuses on the core PALS skill of establishing intraosseous (IO) access in critically ill or injured children.

70-2345   VHS Format........................................$45.00
70-2346   DVD Format........................................$45.00
PEARS

American Heart Association Introduces Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Course

New intermediate program increases training options for healthcare providers

PEARS stands for Pediatric Emergency Assessment, Recognition, and Stabilization. Co-branded with the American Academy of Pediatrics (AAP), this is a pediatric course designed to enhance the healthcare provider’s basic pediatric life support knowledge to prepare students to initiate and manage the first few minutes of a pediatric arrest or prevent the arrest of a pediatric victim in severe cardiopulmonary distress. It is a video-based, instructor-led, traditional classroom course. Students who successfully complete the course will receive a PEARS Provider Course Completion Card.

The main focus of PEARS is prevention, and specifically, the assessment, recognition and stabilization of pediatric victims at risk of severe cardiopulmonary distress. Through unique learning tools, such as video-based simulation, providers can see and hear critically ill children with whom they do not typically come in contact, equipping them to recognize the symptoms of pediatric victims, and thus begin stabilization prior to arrest.

The course is video-based with instructor-led discussion and simulation. Students participate in, practice and complete various skills and learning stations, and are required to pass skills tests, as well as a written test.

Key topics covered are:
- Pediatric assessment
- Respiratory compromise and arrest recognition and management
- Circulatory compromise and arrest recognition and management
- Shock recognition and management
- Resuscitation team concept

The PEARS course is intended for any healthcare provider who might encounter pediatric patients in their profession.

In order to bridge the training gap between healthcare providers who regularly provide advanced pediatric life support and those who infrequently care for critically ill or injured children, the American Heart Association has created a new intermediate course—Pediatric Emergency Assessment Recognition, and Stabilization (PEARS). This course supports healthcare providers who do not regularly provide advanced pediatric life support or are not credentialed for advanced pediatric treatment. Specifically, PEARS develops skills in recognizing certain signs and symptoms of a child in cardiopulmonary distress who needs rapid support.

American Heart Association Press Release
(Dallas, December 11, 2007)
Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Provider Manual

The student text focuses on pediatric assessment and recognition skills for the healthcare provider. The approximately 120-page manual provides information on how to recognize the signs of impending respiratory failure or shock and know the appropriate treatment to initiate and follow recommended procedures for preventing disability and death in children.

80-1417 ...........................................................................................................................................................................................$27.50

Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Instructor Manual

The PEARs instructor manual provides the instructor with information on teaching the new PEARS Course. The manual includes detailed lesson "maps" or plans (60 lesson maps), Scenario Cue Cards, and an instructor CD with precourse and course materials to aid in conducting the PEARS Course.

80-1418 ....................................................................................................................................................................................................................................$38.00

Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Video (DVD Format)

This new video-based PEARS course uses instructor-led discussion and simulation to enhance the pediatric assessment and recognition skills of the healthcare provider. The video depicts the cognitive and psychomotor skills of the PEARS Course and presents video clips to facilitate the group assessment discussions that precede the simulations for the core assessment, respiratory, and shock cases. Running time for the video is approximately 70 minutes. The video is closed-captioned.

80-1419 ....................................................................................................................................................................................................................................$65.00

Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Instructor Package

The instructor package provides educational materials to teach the new Pediatric Emergency Assessment Recognition, and Stabilization (PEARS) Course. The package contains the PEARS Provider Manual (80-1417), which includes the student CD and Pocket Reference Card, and the PEARS Instructor Manual (80-1418), which includes more than 60 Lesson Maps that detail how to teach the course and an instructor CD. Also included in the package are the PEARS Poster Set (80-1477), a PEARS DVD (80-1419), and a stop watch.

80-1478 ................................................................................................................................................................................ $160.00

Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Poster Set

The six four-color posters are intended for use in the classroom. Each set contains one each of the Pediatric BLS Algorithm; the Assess, Categorize, Decide, Act (ACDA) worksheet; and tables to assist in categorizing and managing respiratory emergencies and shock.

80-1477 ...........................................................................................................................................................Set of 6 / $35.00

Pediatric Emergency Assessment, Recognition, and Stabilization (PEARS) Pocket Reference Card

This folding four-color, 4" x 6 ¼" pocket reference card contains information to aid the healthcare provider in recognizing and managing the first few minutes of a pediatric arrest or in preventing the arrest of a pediatric victim with cardiopulmonary distress. There are several assessment and stabilization tables contained in the card, including Vital Signs in Children; Assess-Categorize-Decide-Act (ACDA) worksheet; Summary of BLS ABCD Maneuvers; Management of Respiratory Emergencies; and the Management of Shock flowchart.

80-1476 ...................................................................................................................................................................................................................................... $6.00
ACLS Spanish Edition of Guidelines 2005 for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care:
Updated Guidelines reflect international consensus on resuscitation science derived from Guidelines 2005 conference.

80-2300 ................................................................. $16.50

Spanish Handbook of Emergency Cardiovascular Care for Healthcare Providers 2006
Spanish translation of the 2006 edition of the Handbook of Emergency Cardiovascular Care for Healthcare Providers, which incorporates the latest science from the 2005 American Heart Association Guidelines for CPR and ECC. Includes updated algorithms, information on therapeutic agents, stroke, and acute coronary syndromes.

80-2301 (Replaces 70-2118 & 70-2701)............................... $28.50

Spanish ACLS Provider Manual
This revised ACLS Provider Manual provides updated content for students taking the ACLS Course. The manual is designed to be used before class for preparation, in class as a workbook referencing relative topics, and as a reference book for the student after the class. Material such as Effective Resuscitation Team Dynamics and the 10 ACLS Core Cases are presented in a new formatting style that makes any topic easy to find.

80-2323 (Replaces 70-2118 & 70-2701)............................... $28.50

Spanish ACLS Instructor Package
The new Spanish ACLS Instructor Package provides the educational materials needed to teach the ACLS Course in Spanish. The package includes one copy each of the ACLS Instructor Manual on CD-ROM which includes Lesson Maps for the ACLS Course and Lesson Maps for the ACLS Renewal Course and the ACLS DVD translated into Spanish.

80-2345 (Replaces 70-2689 & 70-2196)............................... $60.00

Spanish ACLS Poster Set
The posters for the ACLS Course contain the science from the 2005 AHA Guidelines for CPR and ECC and are used in teaching the ACLS class. Each Spanish translated set contains one each of the ACLS algorithms: BLS Adult Algorithm, Bradycardia Algorithm, Tachycardia Algorithm, ACS Algorithm, Stroke Algorithm, Pulseless Arrest diagram, and 12-Lead ECG and the Pulseless Arrest Algorithm.

80-2324 ................................................................. Set of 8 / $29.50

Spanish PALS Course Guide and PALS Provider Manual
This all-inclusive bundle of the two PALS student texts provides the PALS student with comprehensive information for the PALS Course. The Spanish Course Guide is designed to be used for class preparation and as a workbook during the course. Also included with the Course Guide is the PALS Pocket Reference Card. The Spanish PALS Provider Manual contains in-depth information on topics for pediatric resuscitation such as Recognition and Management of Shock, and Pharmacology.

80-2325 ................................................................. Set / $35.00

Spanish BLS for Healthcare Providers
This book covers core material such as adult and pediatric CPR (including two-rescuer scenarios and use of the bag mask), foreign-body airway obstruction, and automated external defibrillation. Now formatted in a new style that makes any topic easy to find.

80-2305 ................................................................. $12.50

Spanish Instructor Package: BLS for Healthcare Providers
The package contains Spanish translation of the Instructor Manual; includes Lesson Maps and one BLS for Healthcare Providers DVD and a set of 4-color posters for Healthcare Providers.

80-2328 ................................................................. $75.00

Spanish Heartsaver® First Aid Instructor Package
This instructor package includes Heartsaver First Aid with CPR & AED Student Workbook, Heartsaver First Aid Instructor Manual, Heartsaver First Aid DVD, and Heartsaver Poster set.

80-2358 ................................................................. $95.00

Spanish Heartsaver® First Aid with CPR & AED Student Workbook
The workbook contains the three required modules (General Principles, Medical Emergencies, and Injury Emergencies) and two optional modules (Environmental Emergencies and CPR & AED) for the Heartsaver First Aid Course.

80-2338 ................................................................. $14.00

Spanish Heartsaver® AED Instructor Package
The Instructor Package includes one each of Heartsaver AED Student Workbook, Heartsaver AED Instructor Manual, Heartsaver AED DVD and Heartsaver Poster set.

80-2353 ................................................................. $95.00

Spanish Heartsaver® AED Student Workbook
The workbook includes sections on CPR, AED use, relief of choking in adults and children, and infant CPR and relief of choking.

80-2312 ................................................................. $12.00

Spanish Heartsaver® AED Pediatric First Aid Instructor
Spanish version of the Instructor Package includes one each of: Heartsaver Pediatric First Aid Student Workbook, Heartsaver Pediatric First Aid Instructor Manual, Heartsaver Pediatric First Aid DVD set and Heartsaver First Aid Poster set.

80-2361 ................................................................. $90.00

Spanish Heartsaver Pediatric First Aid Student Workbook
Spanish Heartsaver Pediatric First Aid Student Workbook contains information on how to manage illness and injuries in a child in the first few minutes until professional help arrives.

80-2316 ................................................................. $14.00
Spanish Heartsaver® CPR in Schools® Instructor Package
Spanish version of the Heartsaver CPR in Schools Instructor package contains one each of: Heartsaver CPR in Schools Instructor Manual CD and the Heartsaver CPR in Schools video in DVD format.
80-2356...........................................................$45.00

Spanish Heartsaver® CPR in Schools Student Workbook
Spanish version of Heartsaver CPR in Schools Student Workbook includes sections on CPR and AED use, relief of choking in adults and children, and infant CPR and relief of choking.
80-2310..........................................................$8.50

Spanish Family & Friends® First Aid for Children Instructor Package
Spanish version of the Instructor Package includes: Family & Friends First Aid for Children Instructor CD and Family & Friends First Aid for Children video in DVD format.
80-2367..........................................................$35.00

Spanish Family & Friends® First Aid for Children Student Book
Spanish Student book for the Family & Friends First Aid for Children program contains information on how to manage illness and injuries in a child for the first few minutes until professional help arrives.
80-2340........................................................set of 5 / $12.50

Spanish Family & Friends® CPR Instructor Package
Spanish versions of the Instructor Package includes one each of: Family & Friends Instructor Manual CD and the Family & Friends CPR DVD.
80-2350..........................................................$35.00

Spanish Family & Friends® CPR Student Book
Spanish version of the Family & Friends Student Book contains information on how to perform CPR in adults, children, or infants and how to help an adult, child, or infant who is choking.
80-2315........................................................set of 5 / $12.50

Spanish ACLS Instructor Package
The package includes one copy each of the ACLS Instructor Manual on CD-ROM which includes Lesson Maps for ACLS Course and Lesson Maps for the ACLS Renewel Course and the ACLS DVD translated into Spanish.
80-2345..........................................................$60.00

Spanish ACLS Provider Manual
This revised Spanish ACLS Provider Manual provides updated content for students taking the ACLS Course. The manual is designed to be used before class for preparation, in class as a workbook referencing relative topics, and as a reference book for the student after the class.
80-2323..........................................................$28.50

Advanced Cardiovascular Life Support (ACLS) Poster Set (8)
This set of eight posters for the Advanced Cardiovascular Life Support (ACLS) Course contains the science from the 2005 AHA Guidelines for CPR and ECC are used in teaching the ACLS class. Each Spanish translated set contains one each of the ACLS algorithms: BLS Adult Algorithm, Bradycardia Algorithm, Tachycardia Algorithm, ACS Algorithm, Stroke Algorithm, Pulseless Arrest Diagram, and 12-Lead ECG and the Pulseless Arrest Algorithm.
80-2324........................................................set of 8 / $29.50

Spanish PALS Course Guide and PALS Provider Manual
The Spanish Course Guide is designed to be used for class preparation and as a workbook during the course. Spanish PALS Provider Manual contains more in-depth information on topics for pediatric resuscitation such as Recognition and Management of Respiratory Distress and Failure, Recognition and Management of Shock, and Pharmacology.
80-2325..........................................................$35.00

Spanish Pediatric Advanced Life Support (PALS) Instructor Package
This new Spanish PALS Instructor Package provides educational materials to teach the PALS Course. The package contains the PALS Instructor Manual on CD-ROM and the PALS DVD.
80-2364..........................................................$60.00

Spanish PALS Poster Set
This set of twelve 4-color PALS posters contains the science from 2005 AHA Guidelines for CPR and ECC. These 12 posters are intended for use in teaching the PALS class. Each set contains one each of the PALS algorithms and flowchart posters.
80-2365........................................................set of 12 / $29.50

COURSE COMPLETION CARDS

Spanish Heartsaver® AED (3-Card Sheet)
80-2332........................................................set of 24 / $24.00

Spanish Heartsaver® CPR in Schools® (3-Card Sheet)
80-2333........................................................set of 48 / $24.00

Spanish Heartsaver® First Aid (3-Card Sheet)
80-2334........................................................set of 24 / $24.00

Spanish Heartsaver® Instructor (3-Card Sheet)
80-2335........................................................set of 12 / $15.00

Spanish Heartsaver® Pediatric First Aid (3-Card Sheet)
80-2336........................................................set of 24 / $24.00
Faculty Guide for the AHA Core Instructor Course

The guide for teaching the AHA Core Instructor Course in a classroom setting. Included with the guide are a DVD with video segments required to teach the course; a CD with Lesson Maps, PowerPoint® Slides, and a Completion Certificate for teaching and managing the course; and an instructor copy of the AHA Core Instructor Course Workbook that includes the entire AHA Core Instructor Course on CD. For use by Faculty teaching the Core Instructor Course in a classroom setting. (Training Center security code is required.)

80-1035 ...........................................................................................................................................................................$40.00

Core Instructor Course

This course provides a foundation for teaching and facilitating regardless of an instructor candidate’s area of specialization. For optimal flexibility, the course can be delivered in 3 ways: online through the AHA’s Professional Education Center, on a CD for self-directed learning, or in a classroom setting. Continuing education credit is available to those who take the course online.

The course workbook includes a voucher with a unique key to access the course online. It also includes the course CD, which allows the student access to review the course concepts anywhere, anytime.

This course is a pre-requisite for all new instructor candidates and for instructors adding other disciplines to their teaching credentials (BLS, HCP, Heartsaver; ACLS, PALS). This course is a requirement for all AHA National and Regional Faculty. (Core Course security code, available through the AHA Instructor Network, is required.)

80-1050 ...........................................................................................................................................................................$25.00

Program Administration Manual:
Guidelines for Program Administration and Training, 4th Edition

The Program Administration Manual has been revised to cover the Training Center (TC) administrative and course management details that must be followed by all levels of the Training Network, not just the TCs. The manual covers all aspects of program administration for the educational courses of the American Heart Association (AHA) Emergency Cardiovascular Care (ECC) programs.

80-1485 ...........................................................................................................................................................................$15.00

15% restocking fee applies on all returns.

Orders totaling $100 or less on product, add $10 for minimum order fee (excludes US Military).
Order all your AHA/ECC materials conveniently at www.laerdal.com!

Payment Terms
- We gladly accept the following methods of payment: checks and credit cards (MasterCard, VISA, American Express, and Discover).
- Payment is due 30 days from invoice date unless otherwise noted on the front of the invoice.

Sales Tax
- Applicable sales tax will be added to your order.
- Sales tax is collected in: AL, AZ, CA, CO, CT, FL, GA, ID, IL, IN, KY, LA, MA, MD, MI, MN, MO, NE, NJ, NM, NY, NC, OH, PA, SC, SD, TN, TX, VA, WA, WI*.
- For sales tax charges to be waived, a copy of your state’s applicable exempt organization certificate, resale certificate, or direct pay permit must be included with your order.

*Subject to change without notice.

Returns
- SATISFACTION GUARANTEED! We will gladly accept and credit the full purchase price less a 15% restocking fee for current merchandise returned in new and saleable condition, within 30 days of invoice date. Credit will be issued upon receipt and evaluation of the merchandise. It is essential that you call for an RMA (Return Material Authorization) number prior to returning any item to ensure accurate credit to your account. RMA #s are valid for 30 days.
- Report all shipping and invoice discrepancies to the Customer Support Team within 10 days of invoice date.
- Prices and specifications are subject to change without notice.
- To schedule a return, contact us at: 877-LAERDAL (523-7325) – 8:00AM - 6:00 PM EST

Laerdal has been a proud distributor of the American Heart Association’s Emergency Cardiovascular Care (ECC) materials since 1997. The partnership between the American Heart Association and Laerdal represents more than just a distribution relationship; it reinforces Laerdal’s continued commitment to the emergency cardiovascular care community and helping save lives. Laerdal remains dedicated to the Chain of Survival and it is the company’s hope that by supplying these important training materials, we help to further the mission and objectives of the American Heart Association.
