Accelerate™ De-escalation

When caregivers thrive, patients thrive

The future of healthcare is not built by technology alone. It's built by leaders who create cultures where people feel safe, supported, and prepared.

Workplace violence is one of healthcare's most pressing challenges. Prepare your teams with realistic, hands-on de-escalation training that builds confidence, strengthens communication, and helps create a safer care environment.

A blended learning experience

- Train teams through realistic simulation
- Practice individually in immersive VR scenarios
- Build confidence for real-world encounters
- Measure readiness with actionable data

Experience the Future of De-escalation Training

The Accelerate De-escalation Program combines individual practice with team-based simulation for a comprehensive approach to building skills and organizational readiness.

In-Situ Simulation (Team-Based Practice)

- Certified de-escalation instructor
- Expert facilitator
- Didactic educator
- Live scenario with standardized patient
- Simulation and debrief
- Post-engagement analytic
- Team-based communication and response

Effortless implementation

No hardware. No software. No barriers to adoptions.

Flexible to meet organizational needs and maximize impact. Deploy the Virtual Patient Experience individually or combine both experiences for maximum impact across your organization.

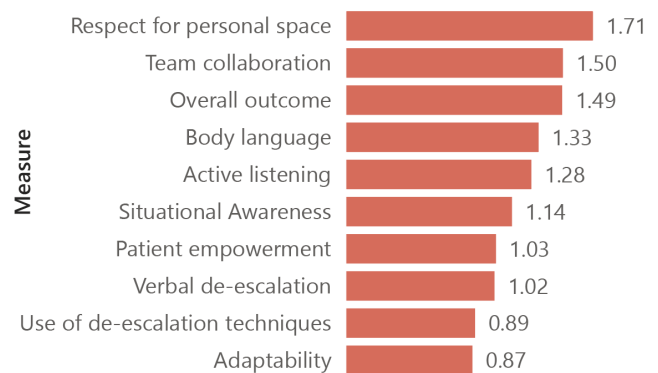

Virtual Patient Experience (Individual Practice)

- Immersive Virtual Reality de-escalation scenarios
- Self-paced, flexible participation
- Builds confidence through repetition
- Unlimited users
- Post-engagement analytics
- No added hardware or software investment

Score Change by Measure

Positive values indicate competency improvement.

Example of one of many performance dashboards available.
