Laerdal Accelerate Program

Simulation brought to you, run in partnership for the moments that matter

Accelerate is managed, on-site simulation that Laerdal brings to your organization and runs in partnership with your team. From setup through facilitation and debrief, the entire experience is delivered for you—so your team can focus on improving performance while gaining meaningful insights.

More than training, it's a structured model focused on performance, not just completion, for strengthening team performance and readiness when it matters most.

This one-of-a-kind program offers turnkey simulation that includes:

Align on goals

Define priorities based on your risks, workflows, and teams, ensuring alignment with your organizational objectives and performance goals.

Select scenarios

Choose targeted scenarios built around real-world situations and tailored to your priorities, workflows, and care environments

On-site simulation

Laerdal brings everything and runs the program in partnership with your educators and leaders.

Debrief and improve

Assess performance, identify gaps, and define actions to help improve outcomes and readiness.

Laerdal Accelerate Program

A Flexible Model That Delivers Impact

Accelerate meets organizations where they are—supporting a range of starting points while delivering meaningful, measurable impact.

✓ **For organizations with established simulation programs:** Expands capacity, extends reach, and increases impact without adding workload.

✓ **For organizations with limited simulation resources:** Provides a complete solution to build capability and launch a program with confidence.

Everything Brought to You

Accelerate makes high-impact simulation training easy with a fully managed program that requires no program infrastructure or capital investment.

Delivered and managed: on-site setup, facilitation, and wrap-up handled in your care setting

Simulators, equipment, and scenarios provided: Aligned to your learning goals and clinical needs

Expert facilitators and operators: Experienced teams delivering best-practice simulation

Structured, immersive learning experiences: Realistic scenarios that engage teams and build readiness

Measured outcomes and performance insights: Actionable data to identify gaps and drive improvement

Courses Built Around Real Challenges

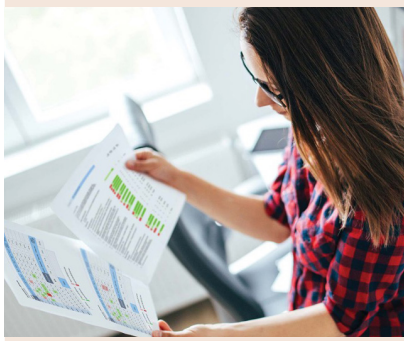

Accelerate includes a growing catalog of simulation experiences designed to support real-world performance.

- Critical Medical Conditions
- Neonatal & NICU
- Obstetric Emergencies
- Patient De-escalation & Safety
- Perioperative Emergencies
- Respiratory Emergencies
- Resuscitation & Code Mgmt.
- Sepsis & Patient Deterioration
- Trauma & Massive Transfusion
- *More In Development!*

Insights and Outcomes

Performance Insights

Provides measurable outcomes and benchmarking data to help demonstrate program impact.

Overall Results

Performance	ACOG Alignment	Sessions	Median Sim Time
73%	3.6/5	34	14.9
ACOG Alignment Adherence	Steps Observed	PPH Emergencies	Minutes

Bleeding Control

Blood Ordered	Blood Arrived	Two Uterotonics Administered
68%	56%	65%
of Sessions	of Sessions	of Sessions
6.7	11.6	7.6
Avg. Minutes	Avg. Minutes	Avg. Minutes
6.7	2,256	1,857
Est. Blood Loss (ml)	Est. Blood Loss (ml)	Est. Blood Loss (ml)

The chart above is an example of a portion of the data provided for a select simulation scenario (postpartum hemorrhage). Estimated Blood Loss is the average amount estimated to have occurred during the training session, measured at the time of each event. The post-partum hemorrhage emergency scenario is designed to simulate patient blood loss at a rate of 100ml per minute starting with 1,100ml lost.
