Chronic Respiratory Disease

A GLOBAL HEALTH CHALLENGE

3 of the top 10

global causes of death are
respiratory-related conditions¹

569.2 million

people are living with chronic
respiratory diseases globally²

4.2 million

deaths were attributed to chronic
respiratory diseases in 2023³

Simulation can build preparedness in respiratory care.

Chronic respiratory diseases (CRDs) remain **major global causes of morbidity and mortality**⁴, placing increasing demands on healthcare systems. Simulation helps healthcare teams **develop clinical confidence, refine care pathways, and improve coordination** across the continuum of care, supporting better outcomes for patients with respiratory conditions.
